| Transmitter/receiver | |
| Dimensions (H x B x D) | 45mm x 25mm x 81mm |
| Weight | 246g |
| Environment | |
| Ambient temperature | +0 to +70° C |
| Ambient humidity | 10% to 85% |
| Power | |
| Input | 100-240VAC @50-60Hz |
| Output | 5VDC 2A |

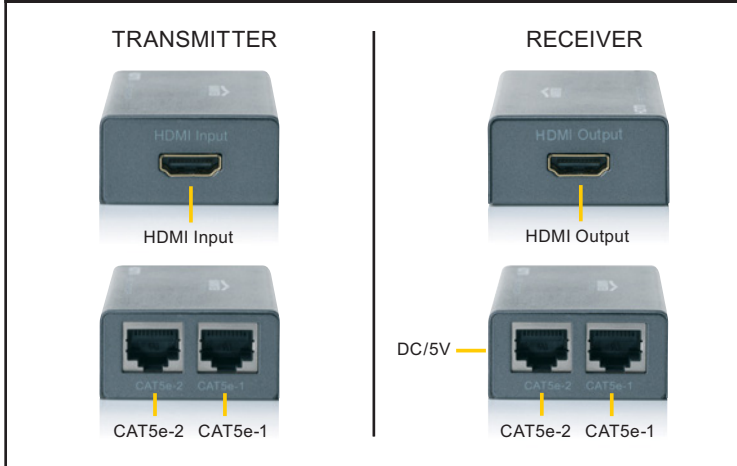

Why use a CAT5 cable for wired Audio/Video transmission?

- The use of this cable has a number of striking advantages:
- little or no loss of quality;
 - can be used over long distances;
 - usable for both SD and HD Audio/Video signals;
 - relatively cheap and widely available;
 - you can place the plugs yourself what makes that:
 - every length can be realised,
 - the cable is easily guided through a PVC-pipe,
 - the holes that need to be drilled can be small;
 - the cable is relatively thin and flexible so it can easily be concealed.
